

Interface Focus

volume 4
2014

Published by
THE ROYAL SOCIETY
6–9 Carlton House Terrace, London SW1Y 5AG

ISSN 2042-8898

The six numbers in this volume can be obtained separately from the Royal Society, 6–9 Carlton House Terrace, London SW1Y 5AG.

Copyright

© 2014 The Royal Society

Except as otherwise permitted under the Copyright, Designs and Patents Act, 1988, this publication may only be reproduced, stored or transmitted, in any form or by any means, with the prior permission of the publisher, or, in the case of reprographic reproduction, in accordance with the terms of a licence issued by the copyright Licensing Agency. In particular, the Society permits the making of a single photocopy of an article from the issue (under Sections 29 and 38 of this Act) for an individual for the purposes of research or private study.

The text paper used in this publication is alkaline sized with a coating which is predominantly calcium carbonate. The resultant surface pH is in excess of 7.5, which gives the maximum practical permanence.

Contents

Volume 4

no. 1, 6 February 2014

Introduction

Nano-engineered bioactive interfaces

By P. A. Netti

20130065

Articles

Mechanical properties and *in vitro* characterization of polyvinyl alcohol-nano-silver hydrogel wound dressings

By R. N. Oliveira, R. Rouzé, B. Quilty, G. G. Alves, G. D. A. Soares,
R. M. S. M. Thiré and G. B. McGuinness

20130049

Preparation and characterization of cellulose-based foams via microwave curing

By C. Demitri, A. Giuri, M. G. Raucci, D. Giugliano, M. Madaghiele,
A. Sannino and L. Ambrosio

20130053

Neural cell alignment by patterning gradients of the extracellular matrix protein laminin

By B. Chelli, M. Barbalinardo, F. Valle, P. Greco, E. Bystrenova,
M. Bianchi and F. Biscarini

20130041

Protocol and cell responses in three-dimensional conductive collagen gel scaffolds with conductive polymer nanofibres for tissue regeneration

By S. Sirivisoot, R. Pareta and B. S. Harrison

20130050

Impact of laser-structured biomaterial interfaces on guided cell responses

By E. Fadeeva, A. Deiwick, B. Chichkov and S. Schlie-Wolter

20130048

Interaction of leech neurons with topographical gratings: comparison with rodent and human neuronal lines and primary cells

By I. Tonazzini, M. Pellegrini, M. Pellegrino and M. Cecchini

20130047

Carbonate hydroxyapatite functionalization: a comparative study towards (bio)molecules fixation

By L. Russo, F. Taraballi, C. Lupo, A. Poveda, J. Jiménez-Barbero, M. Sandri, A. Tampieri,
F. Nicotra and L. Cipolla

20130040

Polyurethane-based scaffolds for myocardial tissue engineering

By V. Chiono, P. Mozetic, M. Boffito, S. Sartori, E. Gioffredi, A. Silvestri, A. Rainer,
S. M. Giannitelli, M. Trombetta, D. Nurzynska, F. D. Meglio, C. Castaldo, R. Miraglia,
S. Montagnani and G. Ciardelli

20130045

Investigation of early cell–surface interactions of human mesenchymal stem cells on nanopatterned β -type titanium–niobium alloy surfaces

By R. Medda, A. Helth, P. Herre, D. Pohl, B. Rellinghaus, N. Perschmann, S. Neubauer,
H. Kessler, S. Oswald, J. Eckert, J. P. Spatz, A. Gebert and E. A. Cavalcanti-Adam

20130046

no. 2, 6 April 2014

Introduction

Nanobiomechanics of living materials

By K.-K. Liu and M. L. Oyen

20140001

Articles

Collective cell traction force analysis on aligned smooth muscle cell sheet between three-dimensional microwalls

By Y. Zhang, S. S. Ng, Y. Wang, H. Feng, W. N. Chen, M. B. Chan-Park,
C. Li and V. Chan

20130056

Introduction to cell–hydrogel mechanosensing

By M. Ahearne

20130038

Dynamics of filopodium-like protrusion and endothelial cellular motility on one-dimensional extracellular matrix fibrils

By N. Xue, C. Bertulli, A. Sadok and Y. Y. S. Huang

20130060

The structure and micromechanics of elastic tissue

By E. M. Green, J. C. Mansfield, J. S. Bell and C. P. Winlove

20130058

Nanobiomechanics of living cells: a review

By J. Chen

20130055

- A hybrid characterization framework to determine the visco-hyperelastic properties of a porcine zona pellucida
By A. Boccaccio, L. Lamberti, M. Papi, M. De Spirito, C. Douet,
G. Goudet and C. Pappalettere 20130066
- Impact of heating on passive and active biomechanics of suspended cells
By C. J. Chan, G. Whyte, L. Boyde, G. Salbreux and J. Guck 20130069

no. 3, 6 June 2014

Introduction

- Computational cell biology: past, present and future
By J. Xing, W. Mather and C. Hong 20140027

Articles

- Control of cell growth, division and death: information processing in living cells
By J. J. Tyson and B. Novak 20130070
- Modelling mammalian cellular quiescence
By G. Yao 20130074
- The balance between cell cycle arrest and cell proliferation: control by the extracellular matrix and by contact inhibition
By C. Gérard and A. Goldbeter 20130075
- Quantitative implementation of the endogenous molecular–cellular network hypothesis in hepatocellular carcinoma
By G. Wang, X. Zhu, J. Gu and P. Ao 20130064
- Epigenetic state network approach for describing cell phenotypic transitions
By P. Wang, C. Song, H. Zhang, Z. Wu, X.-J. Tian and J. Xing 20130068
- Modelling chromosome dynamics in mitosis: a historical perspective on models of metaphase and anaphase in eukaryotic cells
By G. Civelekoglu-Scholey and D. Cimini 20130073
- A computational model for the formation of lamin-B mitotic spindle envelope and matrix
By C. Shi, W. E. Channels, Y. Zheng and P. A. Iglesias 20130063
- A queueing approach to multi-site enzyme kinetics
By P. Hochendoner, C. Ogle and W. H. Mather 20130077
- It is not the parts, but how they interact that determines the behaviour of circadian rhythms across scales and organisms
By D. DeWoskin, W. Geng, A. R. Stinchcombe and D. B. Forger 20130076

Corrections

- Identification of ovarian cancer driver genes by using module network integration of multi-omics data
By O. Gevaert, V. Villalobos, B. I. Sikic and S. K. Plevritis 20140023

no. 4, 6 August 2014

Introduction

- Beyond evolution: game theory and the progression of cancer
By R. Austin 20140044

Articles

- Bacteria and game theory: the rise and fall of cooperation in spatially heterogeneous environments
By G. Lambert, S. Vyawahare and R. H. Austin 20140029
- Evolutionary game theory for physical and biological scientists. I. Training and validating population dynamics equations
By D. Liao and T. D. Tlsty 20140037
- Evolutionary game theory for physical and biological scientists. II. Population dynamics equations can be associated with interpretations
By D. Liao and T. D. Tlsty 20140038
- Game theory in the death galaxy: interaction of cancer and stromal cells in tumour microenvironment
By A. Wu, D. Liao, T. D. Tlsty, J. C. Sturm and R. H. Austin 20140028

The ecology of cancer from an evolutionary game theory perspective By J. M. Pacheco, F. C. Santos and D. Dingli	20140019
Critical transitions in a game theoretic model of tumour metabolism By A. Kianercy, R. Veltri and K. J. Pienta	20140014

no. 5, 6 October 2014

Introduction

The tapestry of resilience: an emerging picture By S. Jain, M. Sprengel, K. Berry, J. Ives and W. Jonas	20140057
--	----------

Articles

The mathematician's control toolbox for management of type 1 diabetes By M. Csete and J. Doyle	20140042
The hypothalamic–pituitary–adrenal–leptin axis and metabolic health: a systems approach to resilience, robustness and control By K. Aschbacher, M. Rodriguez-Fernandez, H. van Wietmarschen A. J. Tomiyama, S. Jain, E. Epel, F. J. Doyle III and J. van der Greef	20140020
Computational modelling of the inflammatory response in trauma, sepsis and wound healing: implications for modelling resilience By Y. Vodovotz	20140004
Sleep and inflammation in resilient aging By M. R. Irwin	20140009
Biological mechanisms underlying the role of physical fitness in health and resilience By M. N. Silverman and P. A. Deuster	20140040
Resilience in the aftermath of war trauma: a critical review and commentary By B. T. Litz	20140008
Glucocorticoid-related predictors and correlates of post-traumatic stress disorder treatment response in combat veterans By R. Yehuda, L. C. Pratchett, M. W. Elmes, A. Lehrner, N. P. Daskalakis, E. Koch, I. Makotkine, J. D. Flory and L. M. Bierer	20140048
One bad apple: experimental effects of psychological conflict on social resilience By D. Pincus	20140003

no. 6, 6 December 2014

Introduction

Theme Issue in memory of Tom Duke By F. Jülicher	20140072
---	----------

Articles

Ratchets in hydrodynamic flow: more than waterwheels By J. C. Sturm, E. C. Cox, B. Comella and R. H. Austin	20140054
A minimal model for metabolism-dependent chemotaxis in <i>Rhodobacter sphaeroides</i> By S. Fan and R. G. Endres	20140002
Effects of molecular noise on bistable protein distributions in rod-shaped bacteria By L. Wetmann, M. Bonny and K. Kruse	20140039
On growth and form of <i>Bacillus subtilis</i> biofilms By J. Dervaux, J. C. Magniez and A. Libchaber	20130051
Phase-locked spiking of inner ear hair cells and the driven noisy Adler equation By R. Shlomovitz, Y. Roongthumskul, S. Ji, D. Bozovic and R. Bruinsma	20140022
A model of ionic transport and osmotic volume control in cochlear outer hair cells By T. West and J. Ashmore	20140018
Ensemble velocity of non-processive molecular motors with multiple chemical states By A. Vilfan	20140032
Molecular mechanisms for microtubule length regulation by kinesin-8 and XMAP215 proteins By L. Reese, A. Melbinger and E. Frey	20140031
A phenomenological density-scaling approach to lamellipodial actin dynamics By A. Lewalle, M. Fritzsche, K. Wilson, R. Thorogate, T. Duke and G. Charras	20140006

Separation of blood cells with differing deformability using deterministic lateral displacement By D. Holmes, G. Whyte, J. Bailey, N. Vergara-Irigaray, A. Ekpenyong, J. Guck and T. Duke	20140011
A kinetic mechanism for cell sorting based on local variations in cell motility By C. Strandkvist, J. Juul, B. Baum, A. J. Kabla and T. Duke	20140013
Stress distributions and cell flows in a growing cell aggregate By M. Delarue, J.-F. Joanny, F. Jülicher and J. Prost	20140033

GUIDANCE FOR AUTHORS

Selection criteria

The criteria for selection for both theme issues and their constituent articles are scientific excellence, originality and interest across the physical sciences / life sciences interface. The Editor is responsible for all editorial decisions, in part based on the reports received from the referees. Many more good proposals and articles are submitted to us than we have space to print; we give preference to those that are of broad interest and of high scientific quality.

Publishing format

Along with all Royal Society journals, we are committed to archiving and providing perpetual access. The journal also offers the facility for including Electronic Supplementary Material to papers free of charge.

Conditions of publication

Articles must not have been published previously, nor be under consideration for publication elsewhere. The main findings of the article should not have been reported in the mass media. Like many journals, *Interface Focus* employs a strict embargo policy where the reporting of a scientific article by the media is embargoed until a specific time. The Editor has final authority in all matters relating to publication.

Electronic Submission details

The majority of *Interface Focus* issues are commissioned. However, suggestions for themes are welcome and initial proposals should be addressed to tim.holt@royalsociety.org. For full submission guidelines and access to all journal content please visit the *Interface Focus* website at rsfs.royalsocietypublishing.org.

Articles

Articles are contributions containing original scientific research.

Reports

Reports are short, letter-style contributions which are published rapidly. Preliminary and more speculative work of high quality is strongly encouraged.

Reviews

Reviews are articles of the highest quality and aim to be of interest to communities working at the physical sciences / life sciences interface. Reviews cover the latest developments in an area of cross-disciplinary research. They put such research into a broader context and are written in a style that makes them accessible to readers in a wide range of disciplines. Complete literature surveys are not encouraged.

Topics

Interface Focus welcomes articles on a diverse range of topics including, but not limited to

- biocomplexity
- biocomputation
- bioengineering
- bioinformatics
- biomaterials
- biomechanics
- bionanoscience
- biophysics
- chemical biology
- medical physics
- synthetic biology
- systems biology
- theoretical biology
- tissue engineering

The Royal Society, the national academy of science of the UK and the Commonwealth, is at the cutting edge of scientific progress. We support many top young scientists, engineers and technologists, influence science policy, debate scientific issues with the public and much more. We are an independent, charitable body and derive our authoritative status from over 1400 Fellows and Foreign Members.

Our mission: to expand knowledge and further the role of science and engineering in making the world a better place.

The Royal Society's strategic priorities are to

- The Royal Society's strategic priorities are to:
- invest in future scientific leaders and in innovation,
- influence policymaking with the best scientific advice,
- invigorate science and mathematics education,
- increase access to the best science internationally, and
- inspire an interest in the joy, wonder and excitement of scientific discovery.

For further information on the Society's activities, please contact the following departments on the extensions listed by dialling +44 (0)20 7839 5561, or visit the Society's Web site (royalsociety.org).
